

## **Team 40 UI Evaluation**

### **Start Screen**

- buttons are half-opaque
- screen is smaller than rest of game screens
- buttons aren't centered

### **Player Config**

- can make player without name (default?)
- reliance on sound for modifying skills = not good
- can't read "pilot" text

### **S1**

- FUNDS & FUEL needs to be more separated

### **S1 Marketplace**

- left side text overlaps (narcotics and robots are missing)
- no whitespace to right of Return button
- left side text = verbose (e.g. "You have...")
- why are "water" and "ore" bolded?

### **SPAAACE!**

- planet names...wtf?

### **S2**

- same as S1

### **S2 Shipyard**

- grid isn't formatted correctly (numbers overlap gridlines)
- buying ship automatically takes you to upgrade screen instead of just updating the ship
- let me know what happens to old ship cargo when I buy new ship

### **S2 Shipyard Upgrade**

- can't sell ship upgrades
- can't go from upgrade screen back to shipyard

## **Police Encounter**

- fine

## **S3PT2**

- same as S1 and S2
- buttons aren't consistent on each one

## **YNR**

- YNS?

## **Pirate Encounter**

- what?
- my ship was destroyed, but everything's fine... What is going on?

## **Information Tab**

- neither "Inventory" or "Ship" work consistently (Ship info shows on planet screen, but not Inventory)?
- Ship information grid is off

## **Saving Tab**

- there's no confirmation message for saving

## **S3**

- Funds and Fuels are spaced out correctly

## **Universe**

- change names of solar systems please

## **Giant**

- bought fuel, wasn't told how much fuel was bought (or the price)
- maybe call "Refuel" instead of "Buy Fuel"?

\* have been travelling to all these planets, haven't refueled, still haven't managed to run out of fuel...

## **Big**

- same as other planets

### **Insert Name**

- we get what you're doing with the names... We don't like. Stahp. Plz.

### **Error**

- buying moon, cool
- kind of weird having moon cost on planet screen

### **Moon**

- buying moon takes you to blank screen...?
- music starts again when you buy moon? Maybe have a different sound than start screen music?

[   ]

- same as other planets

### **Planets (General)**

- maybe show tech level of each planet on each screen?
